September 18 2014	Revised for iOS8 release	Product/Tech Comm

Introduction

This Certified Device List outlines all devices that have been tested and certified to work with Mobiliti Business.

The Certified Device List enables Fiserv to provide greater support for phones our clients are currently using, and the phones we predict they will begin using between now and the next quarterly release of the Certified Device List. All operating system updates received for phones at the time of this list publication are also supported.

Audience

This user guide is provided to clients of Fiserv on the basis of being Commercial in Confidence. This document is intended for clients of Fiserv.

Scope

This document specifies only the phones supported or under evaluation for Mobiliti Business ASP model as of the effective date of this document.

The applicable channels include Push Notifications and the Smartphone Application (APP).

Limitation of Applicability

For a given mobile phone model, a manufacturer may provide different versions of hardware, firmware, and operating system software. This practice is common, particularly for phones that are released into different geographic territories. These different versions of the same phone model may operate differently to the model version that has been assessed for the purposes of its inclusion in this document. Therefore, if the recipient of this information intends to give advice on the compatibility of a phone with the Mobiliti Business from Fiserv product, this must be tempered with a disclaimer informing the advisee of the limitation of the information.

Supported Operating Systems

The following statements outline the scope of general device and operating system support for Mobiliti Business. Only devices explicitly listed in this Certified Device List are fully supported. Other devices that conform to the general support policy below may also function.

Operating System	Minimum OS Version Support	Maximum OS Version Support	Hardware Requirements	Channel Support
Android	Android version 2.3	All later major version updates are supported; for example 2.3, 4.0, 4.1, 4.2	Remote Deposit Capture support requires a camera of at least two megapixels in resolution	Android Application Push
iOS- iPhone	iOS version 6.0	All later major version updates are supported; for example 6.0, 6.1, 7.0, 8.0 Beta releases of iOS will not be supported until they are publicly released	None	iPhone Application Push
